The Next Generation in Thermal Test Performance
A New Generation of Excellent Customer Service

RETROFIT SYNERGY NANO TEMPERATURE CONTROLLER

Operates Hot/Cold Plates & Temperature Chambers from other Manufacturers

- Ideally suited for Sigma Systems Thermal Platforms
- Dual Channel capability option for running two systems, independently or simultaneously
- Optional configurations available for GPIB, failsafe systems, different power requirements, etc
- Color LCD Touch Screen
- Ethernet, USB, and serial communications standard
- Thumb drive compatible
- Flexible inputs allow alternate sensors and expandability
- Network printing, logging and graphing functions
- Selectable resume-control functions
- Web server option
- CE mark certification available

This state of the art temperature controller can be configured to operate most thermal platforms (a.k.a. Hot/Cold Plates) and temperature chambers from other manufacturers. When repair or replacement costs are no longer justified, and/or you simply need a better performing, fully featured easy to use controller, this ingenious *TotalTemp Retrofit Synergy Nano Controller* is the premium solution at a price that won't break your budget.
