The Next Generation in Thermal Test Performance  
A New Generation of Excellent Customer Service

## RETROFIT SYNERGY NANO TEMPERATURE CONTROLLER

*Operates Hot/Cold Plates & Temperature Chambers from other Manufacturers*

- Ideally suited for Sigma Systems Thermal Platforms
- Dual Channel capability option for running two systems, independently or simultaneously
- Optional configurations available for GPIB, failsafe systems, different power requirements, and more
- Easy to use Color LCD Touch Screen
- Ethernet, USB, and serial communications standard
- Thumb drive compatible
- Flexible inputs allow alternate sensors and expandability
- Direct Network printing, logging and graphing functions
- Selectable resume-control functions
- Web server option, FTP, email and text message reporting

This state of the art temperature controller easily can be configured to operate most thermal platforms & temperature chambers by Sigma Systems (inTest). When repair or replacement is no longer possible or justified, or you simply need a better performing, fully featured easy to use controller, this Advanced *TotalTemp Retrofit Synergy Nano Controller* is the premium solution at a price that won't break your budget. We also offer budget conscious models that have the functions many customers require. Contact TotalTemp today!
